

# TESTIMONIALS FOR MATH 5733 BOOK

**Lynn, you are a saint!!! The first time I took the Praxis math (without your book) I scored a 114, the second time I took it - 110. Then I bought a copy of your book and studied it for about a month, and my score is now a whopping 176 and I passed!!! I am SOOO glad that you created this book and I'm very glad I stumbled upon it!**  
**Angel Barger**

Hello my name is Stephanie Creevey and I had purchased your Praxis Core Math 5733 book to study for my exam. I just wanted to let you know that your book is amazing!! I passed my exam with 156 when I need 142!

The material in the book is straight to the point and makes learning math more enjoyable. I've been searching for study guides and never found the right one until I came across your book. It was the best choice I have made. Thank you so much for creating this book and helping me understand math. I feel so confident while taking the exam and still had plenty of time to review all of my questions! Again your book is AMAZING!!

Sincerely, Stephanie Creevey

**Hello, my name is Denise James. I am sending you this email to first say thank you. I have studied your materials for five months. The reason is due to COVID-19 the test centers constantly had to reschedule my exam. I guess God was giving me extra days and time to study. The good news I have passed my exam. My score was 178. I want to thank you for the help because I almost gave up. Please keep doing what you are doing to help future teachers who dream to teach and mentor young children. Every question you had in your book was really similar to the questions on the actual exam. Again, thank you so much and God Bless.**

Just wanted to say thank you for creating this book. Only had a few weeks to prepare being the first time I didn't pass and this book raised my score 20 points helping me pass! I will tell everyone that's struggling with this test to buy this book. Thanks again!  
Joseph Ruzicka

**I just want to thank you SO much for creating the Core Math Made Easy study guide for the Praxis! I am pursuing a bachelor's degree in Elementary Education with a specialization in pre-k and kindergarten. I passed the Reading and Writing sections of the Praxis I the first time I took it, but I struggled so much with the Math. After failing it six times, I was ready to give up. The sixth time I took it, I got a 148 but needed 150 to pass. A couple months ago, a girl who was tutoring me told me she had purchased the PDF of your study guides and practice tests for 5733, and they helped more than any test prep I had ever used in the past. I took it again and ended up passing with a 190!!! Thank you for your help!**

**Tori**

**I am reaching out to you to thank you for helping me pass the math core 5733. Math has always been a struggle for me and I've taken this test before they've changed it several times. In the past I have scored a 129 and a 134. Your manual has greatly helped me prepare for this test. I scored 162 which is a passing score.**

**Thank you! Thank you!**

**Monica Bagan**

**I am emailing to inform you of the GOOD NEWS!!!! I finally passed CORE Math thanks to your help!!! After taking the test 4 times already!!!!... Finding your book was a blessing! Wished I had surfed the internet \$400 ago and found your book. But it's all in the past now. I stayed around the 130 score average before (134, 128, 130, 134), but after your book I did not only pass, but I nailed it. Get ready for this score...194!!!! I couldn't believe my eyes...had to wait weeks for the results because after I finished my score was N/S (not scored) and needed further analysis... so I knew then I must have done well, but didn't realize I had done so good! As I mentioned in an email before the test, I felt confident and was ready. Your reassurance of having taken the test is where my confidence came from and not that I was just studying another book and HOPING and not knowing for sure if the information I was studying would actually be on the test (which most of it was not)! I have taken 2 workshops and neither was of any help! I can't say thank you enough! I'm for sure writing this review on your website! Thanks again!!!!**

**Forever Grateful,  
Candy Ulmer from Mississippi. :-)**

I passed- FINALLY!!

160! Thank you so much. I've used several resources, but yours is the one that really got me on the track of understanding different math concepts.

Robin

*Just writing to let you know that I took the 5733 test on Nov. 2nd and got a 174 on it (which happens to be the minimum score needed to get into the TTT program at Spalding where I am thinking about applying). Awesome book. It helped me immensely. Thanks for making it.*

*Terri*

**I just want to let you know that I have finally passed the Praxis Math Core (5733). I had taken it this summer and failed miserably! I have purchased many study guides including the ETS study guide but none of them were close to being as helpful as yours. However, this time around on November 12, 2019, I took the exam again and I felt so confident and kept telling myself that I had to write to you to give you a million thanks!!!!**

**I studied every single page and took the exams as if it were the real test. When I meet new people who will be taking the same exam I will recommend your study guide. Thank you!**

**You have made this mom to a two year old who works full time 40 hours a week be sooo much closer to becoming a certified teacher!!**

**A very thankful teacher to be,**

**Liliana**

**I got a 184! THANK YOU SO MUCH! Your book is a life saver!**

**Tina McBride**

I just wanted to email you and thank you so much for your Core Math Made Easy book. I took the Core Math test 2 different times and finally passed this morning. I could not have done it without you!

Thank you so much,  
Becca

**I would just like to thank you so much for creating this book. I took the Core Math exam for the first time and received a 192/200! I have used other study guides before yours, but I wasn't confident that I would get a passing grade. By chance, I saw your book mentioned on a forum and then I read all the great reviews on the site. I took the chance and so glad that I did. Thank you so much!**

**Diana**

I don't think I could ever express enough gratitude towards you and all that you do to help those of us who struggle in math, especially when it comes to standardizing tests. I took the Praxis Math 5732 a total of 6 times and unfortunately stayed within the 140's range. Today, with the help of Math Made Easy, I passed my Praxis Math 5733 with a 182!!! I went in feeling confident and like I'd pass, but I definitely wasn't expecting that score!

Thank you for helping me to pass!

Now onto the Elementary Math 5003...I know I can do this!

Sincerely,

Kylie

I got 8 questions wrong and I passed with a 184 on my very first time taking the test. Your book is amazing and I am so grateful that I found it in time!

Erin

I just wanted to share an update with you regarding the Praxis test. After working every problem in your study guide I was able to pass the new math praxis test.

Thank you very much for his most needed information.

LaTasha Burroughs

My name is Hailey and I am a Liberty Alumni. A few weeks ago I purchased your study prep for the mathematics section of the Core and I wanted to write to you and thank you, because I passed! I have been struggling with this exam, and your prep was extremely helpful! Thank you again!  
Hailey Wunder

I know my daughter already wrote and thanked you for your book but I want to thank you myself. So far it has taken her 13 tries to pass five of the seven required Praxis tests. The first time she took the math core she failed by 15 points. The second time she took the math core she failed by 30 points and was completely discouraged. She was going to have to relearn a lot of information and it seemed impossible, until someone recommended your book. After studying from your book her score improved by 32 points which gave her a passing score. So far it has been an exhausting year and a half of testing. So many times she wanted to give up but persevered. She has 2 tests to go (reading and writing core) but faith in herself thanks to you. This is my baby girl with a dream to have her own classroom and a desire to change the lives of children. She's going to get there and she's going to be an amazing teacher. And YOU are partly responsible for her success. Think of it this way.... every little life she touches, every child she loves for the next 40 yrs will have been loved by you. So thank you for the work you did and the time you put into MY child's future. I'm very grateful.

**Finally passed math with a raw score of 181. Just know math is my weakest subject but Math Made Easy helped sooo much. This is the only thing I studied with.**

 Heather Messer

Today was my third time to take the Praxis Math and I passed with a 171! My first two attempts I scored a 128 both times. I am NOT strong at math at all and I was in shock when my score popped up that high. My advice to anyone struggling is to purchase the Math Made Easy book

I just passed Math. Thank y'all so such. Math made easy was the best resource you can purchase for this. I saw every problem like the praxis ones but 2 in the packet .

**Lauren Peters** ▶ Praxis 5001 (all subjects), 5622, 5205, 5025, Core (all subjects)...

Do you all think math made easy is worth the money? I feel like I've spent so much on these studying resources to prepare and I don't really want to spend more but if it'll help me pass on the first try I am all for it!

**Kendrea Tucker Lusk**  
1000% it is the only reason I passed it.

**Bailey Covington**  
Definitely worth it. Made a 156 the first time, then bought the book and made a 182!
